

### The Census of Coorg.

COORG, THE SMALLEST PROVINCE IN INDIA, is hardly the size of the county of Hampshire and contains just the same number of inhabitants (173,055) as that of Buckinghamshire. But of this number only 120,110 are indigenous to the Province, the other 52,945 being immigrants, concerned chiefly in the cultivation of coffee. A mountainous and rugged country for the most part, but withal fruitful, it is not surprising to find that Coorg is more sparsely populated than most parts of India. Nearly three-fourths of its population are dependent for their livelihood on pasture and agriculture. According to the Census of 1891, the population of Coorg was 173,055 as against 178,302 in 1881, showing a decrease of 5,247 or 2.94 per cent. "The explanation of this striking exception to the general increase of population throughout India", writes Mr. Stuart, "is to be found in the fact that a very high proportion of the population of Coorg consists of immigrant labourers who come from Mysore and the neighbouring Madras districts to work on the coffee plantations." As soon as Mr. Stuart found there was a decrease of population he addressed the District Magistrate on the subject, who informed him that he attributed the decrease to the fact that a large number of immigrant labourers had returned to their homes in Malabar, South Canara and Mysore by the date of the Census of 1891, while in 1881 the coffee season being later these people were enumerated in Coorg. This view is borne out by statistics, the number of persons born in Coorg showing an actual increase of 18,673 during the ten years. The coffee season of 1890-91 was a very early one, crops being light, but for all that we notice that the value of exports of this staple during this year is put down at Rs. 25,55,400. During the ten years between the two Censuses, the cultivation of this product had largely increased, the area under coffee having advanced by 15,491 acres or 32.70 per cent.

The number of Europeans in the Province is 125, of whom 30 are females. Of this 125, 69 are English, 30 Scotch and 10 Irish, the rest coming from various other countries

in Europe. The people of Coorg like those of Malabar and parts of Canara live in isolated homesteads and the Coorg village is merely a revenue expression denoting the area lying within certain boundaries. The only towns of any importance are Maroara, the old capital of the Province, lying at the head of the Sampaji ghaut which leads down to Mangalore; Virarajendrapet, at the head of the Perambady ghaut, down which the road to Tallicherry and Cannanore runs, and Frazerpet near the Mysore boundary, also close to a ghaut bearing the same name as the town. The Coorgs do not affect a town life, their inhabitants consisting chiefly of Christians and Mahomedans. Referring to the religion of the Coorgs, Mr. Stuart writes:—"In the report on the Census of the Madras Presidency I have attempted to show that the Hinduism of its Dravidian population is nothing more than a thin veneer of Puranic beliefs overlying a great mass of demonolatry, combined with the worship of tutelary deities of human origin. Mr. Rice's excellent account of the Coorg Hindus brings out the same facts very clearly and the expression Hindu must therefore be understood as indicating only a partial and not very living belief in the gods of the Brahman pantheon." Christians in Coorg number 3,392, of which the greater proportion are Roman Catholics. Two persons, it appears, returned themselves as Christian, but stated that the sect they belonged to was "Heathen." Education in this province is fairly well advanced amongst the males, most Coorg men being more or less educated, but only four per cent of their women can read or write. The Census Report of Coorg is compiled with the same care as Mr. Stuart has displayed in his *magnus opus*, the Census of Madras. It is of interest to those who in this unique portion of India have any concern but owing to the numbers enumerated being so small and to their being such a high proportion of immigrants, it was not possible to draw any valuable deductions from the Census of this little out-of-the-way Province.

## PREFACE.

---

THE completion of the Census Report of Coorg has been delayed, as I felt myself bound to give my first efforts to Madras. It would perhaps be better, in many ways, to entrust the administration of the Coorg Census to a local officer in future, and this would allow of the tables and report being issued at a much earlier date.

This report is somewhat brief, but I have, I hope, noticed all the salient features in the census statistics, and given explanations where they were required. The absolute numbers dealt with are so small that in many cases it was not safe to draw from them deductions which are permissible enough when the facts are more varied as in a large population. Matters are further complicated, too, by the high proportion of immigrants among the people of Coorg.

I am glad of this opportunity to acknowledge the assistance rendered to me throughout by Mr. Brooke Leggitt, the First Assistant Commissioner and District Magistrate. Without his cordial co-operation the success which attended the taking of the census would have been impossible.

H. A. STUART,

*Superintendent of Census Operations.*

OOTACAMUND,

22nd March 1893.

REPORT  
ON THE  
CENSUS OF COORG, 1891.

CHAPTER I.  
PHYSICAL DESCRIPTION, AREA, DENSITY, TOWNS,  
VILLAGES AND HOUSES.  
(TABLES I, III, IV AND V.)

1. The tiny province of Coorg lies on the summits of the Western Ghats and is bounded on the west by South Canara, on the south-west and south by Malabar, and on the north and east by the Mysore State. The country is one of hill and dale and forest, the mountain peaks rising to a height of nearly 6,000 feet above sea level, while the cultivated and inhabited parts have an altitude of from 3,000 to 3,500 feet. The main drainage of the country is towards the east, the most considerable of the rivers being the Káveri, which rises at a place called Tale Káveri, on the extreme edge of the ghâts. There are many minor streams and the water-supply is everywhere abundant throughout the year. There are no natural lakes of any size.

2. The physical configuration of Coorg gives the greater part of it an exceptionally heavy rainfall during the time of the south-west monsoon, the dense rain clouds of which are arrested by the mountain summits and discharge their copious showers with but little intermission from June to August. The average annual fall during the prevalence of the summer monsoon is over 100 inches and the total annual fall exceeds 120 inches. The country round Frazerpet, however, on the extreme east of the province, gets comparatively little rain from the south-west monsoon, as the elevation is lower.

3. The government of Coorg is administered by a Chief Commissioner, an office which is now held in conjunction with that of Resident in Mysore. The principal executive officer is the Commissioner, who combines the functions of Civil and Sessions Judge and head of the revenue administration. One Assistant Commissioner performs the double duty of District Magistrate and head of the police, while the second Assistant is a judge for the trial of civil suits. The country is divided into six taluks and each is directly administered by a native officer called a Subedar. Each taluk again is sub-divided into *náds* or *hoblis*, the head of which is styled a Parpettegar.

TALUK.	Area in square miles.
Marcára . . . . .	216'30
Padinalknád . . . . .	399'90
Yedenalknád . . . . .	201'45
Kiggatnád . . . . .	410'45
Nanjarájpátna . . . . .	263'89
Yelusavirashíme . . . . .	90'82
TOTAL . . . . .	1,582'81

4. The gross receipts of the province in 1890-91, the year of the census, amounted to R8,71,964, and the net receipts to R6,20,995. The expenditure from this

Revenue and Expenditure.

net income amounted to R3,71,514, and there was thus a surplus of about two and a half lakhs of rupees. The principal sources of income are the land revenue, excise on spirits and drugs, state forests and stamps; and the chief items of expenditure are civil establishments, public works and education.

5. The imports, including R2,47,500 of treasure, are valued at R17,20,170 and the exports at R27,78,800. The grain imported is of the estimated value of

Trade.

R2,00,000, and the imports of salt are put at the same figure, while a sum of R2,17,150 is entered for provisions. The only other considerable items of import are live stock, manufactured piece goods, oils, liquors, and sugar and saccharine produce. The exports consist almost entirely of coffee, the value of which is entered as R25,55,400. Wood comes next with R1,03,700, and then cardamoms and spices, valued at R53,600.

6. The area of Coorg is 1,583 square miles or a little less than the size of Hampshire. There are eight English counties with an area larger than that of

Area and Population.

Coorg.

The population of Coorg is 173,055 or about the same as that of Buckinghamshire in 1881. There are only five English counties with a population less than that of Coorg.

It is perhaps unnecessary to state that Coorg is much the smallest of all Indian provinces both as regards area and number of inhabitants. The average sub-division of a Madras district has a larger area and a greater population.

7. There are in Coorg 109 persons to each square mile. There are 5.85 acres to each individual, and the mean distance between each person is 181 yards. The mar-

Density, Arealty and Proximity.

ginal table shows that Coorg is more sparsely populated than most parts of India.

PROVINCE.	Persons per square mile.	Acres per person.	Proximity in yards.
Coorg . . .	109	5.85	181
Madras . . .	252	2.54	119
Bengal . . .	471	1.36	87
Bombay . . .	151	4.24	154
N.-W. P. and Oudh . . .	436	1.47	91
Punjab . . .	189	3.39	138
Burma . . .	45	14.21	282
Mysore . . .	177	3.62	142

In the South Canara district of Madras which borders on Coorg, there are 271 persons to the square mile, but in the Nilgiris, a district which resembles Coorg in many respects, the number is only 104. The density of the population in Coorg is not one-fourth of that of England and Wales, but it is not much less than that of Scotland, where there are only 132 persons

to the square mile. We must in fact take into consideration the very mountainous nature of the country, for the density is probably as high as in most districts of similar character.

8. The total number of towns and inhabited villages is 497, which is six less than the number in 1881; but it is not clear whether the number for that year includes

Towns and Villages.

uninhabited villages also. The average population of each is 348, but for villages alone the mean number of inhabitants is 320. The average area of each, that is the area of the parish, so to speak, not that of the inhabited site alone, is 3.19 square miles, and the mean distance between each site is 1.92 miles. The people of Coorg, however, like those of Malabar and parts of Canara, live in

isolated homesteads, and the Coorg village is merely a revenue expression denoting the area lying within certain boundaries. This must be borne in mind in considering the statistics given in Table III, which shows the number and population of towns and villages of different sizes. From that table we find that 45·5 per cent. of the villages contain less than 200 inhabitants, 78·1 per cent. have less than 500 inhabitants, and in the case of 95·6 per cent. the population is below 1,000. Put in another way, 11·2 per cent. of the population live in villages with less than 200 inhabitants, 44·1 per cent. in villages with less than 500 inhabitants and 77·8 per cent. in villages whose population is less than 1,000 persons. These statistics relating to towns and villages are compared with those for Madras in the following tables :

*Number of towns and villages in each group out of 1,000.*

PROVINCE.	1—199.	200—499.	500—999.	1,000—1,999.	2,000—2,999.	3,000—4,999.	5,000 and over.	TOTAL.
Coorg	455	326	175	36	4	2	2	1,000
Madras	402	243	184	115	33	16	7	1,000

*Number of persons in 1,000 living in each class of village or town.*

PROVINCE.	1—199.	200—499.	500—999.	1,000—1,999.	2,000—2,999.	3,000—4,999.	5,000 and over.	TOTAL.
Coorg	112	329	337	126	29	26	41	1,000
Madras	53	131	211	258	127	98	122	1,000

9. The five places noted on the margin have been shown as towns in the

**Towns.**

TOWNS.	POPULATION.		Variation.
	1891.	1881.	
Mercára .	7,034	8,383	-1,349
Virájjendrapet .	4,447	4,576	-129
Frazerpet .	1,710	1,310	+400
Somvárpet .	1,510	1,528	-18
Kodlipet .	810	856	-46

even the largest has a smaller population than many a village of the Madras Presidency, while Frazerpet, Somvárpet and Kodlipet can have very little of an urban character. It will be noticed that the population of all except Frazerpet has decreased since 1881. The decline is considerable only in the case of the Mercára, where the difference is attributed to the withdrawal of the regiment formerly stationed there. The decrease in the other cases is probably more apparent than real, and is attributable to the same causes as have affected the population as a whole. These will be noticed in the next chapter.

10. The total population of these five so-called towns is 15,511, so the

**Urban and Rural population.**

	NUMBER OF PERSONS PER OCCUPIED HOUSE.	
	In Towns.	In Villages.
Coorg	4·89	6·67
Madras	5·60	5·28

family houses containing several generations of the same parent stock.

Coorg.

The annexed statement shows the distribution between town and country

RELIGION.	PROPORTION IN		PERCENTAGE OF URBAN AND RURAL POPULATION FOLLOWING EACH MAIN RELIGION.	
	Towns.	Villages.	Urban.	Rural.
Hindus .	68.1	93.19	68.84	92.78
Musalmans	28.56	71.44	23.32	5.74
Christians	32.93	67.07	7.20	1.45
Others .	65.36	34.64	0.64	0.03

of the followers of each religion. It will be seen that Musalmans and Christians affect a town life much more than Hindus, a feature which is also observed in Madras, and is due to the preference for trading shown by the followers of the cross and the crescent.

11. The number of occupied houses is 26,806 and the average number of inmates of a house is 6.46. In 1881 the average was 7.98, but the definition of a

Houses.

house seems to have differed on the two occasions. I do not, however, think

					Number of persons per occupied house.
Coorg	.	.	.	.	6.46
Madras	.	.	.	.	5.31
Bombay	.	.	.	.	5.59
North-West Provinces and Oudh	.	.	.	.	5.70
Punjab	.	.	.	.	6.67
Mysore	.	.	.	.	5.53

that the difference can have had any great effect in the case of ordinary dwelling houses, and I believe that a great part of the decrease in the average number of occupants indicates a real improvement. The averages for other provinces of India are given in the marginal statement. In

Canara the average is 5.57, in Malabar 5.87, and excluding Madras city, there is only one district (S. Arcot) of the Madras Presidency in which the average is higher than that of Coorg.

The average space to each house is 37.79 acres and the mean distance between each is 460 yards. The corresponding figures for the Madras Presidency are 13.47 acres and 274 yards.

## CHAPTER II.

### THE MOVEMENT OF THE POPULATION.

(TABLE II.)

12. The population of Coorg on the 17th February 1881 was 178,302: on the 26th February 1891 it was 173,055. The population has thus decreased by 5,247 or 2'94 per cent.

Year.	POPULATION.		
	TOTAL.	Males.	Females.
1881 . . . . .	178,302	100,439	77,863
1891 . . . . .	173,055	95,907	77,148
Variation . . . . .	—5,247	—4,532	—715
Variation per cent. . . . .	—2'94	—4'51	—0'92

The explanation of this striking exception to the general increase of population throughout India is to be found in the fact that a very high proportion of the population of Coorg consists of immigrant labourers who come from Mysore and the neighbouring Madras districts to work on the coffee plantations. As soon as the preliminary compilation brought to notice that there had been a decrease instead of an increase of the people, I addressed the district Magistrate on the subject, and he informed me that he attributed the decrease to the fact that a large number of these immigrant labourers had returned to their homes in Malabar, South Canara and Mysore by the date of the Census, while in 1881, when the Census was taken nine days earlier in the year and the coffee season was later than in 1891, these people were enumerated in Coorg. This view is fully borne out by the statistics. Taking first those relating to birthplace we get the following results :—

Year.	BORN IN COORG.			BORN ELSEWHERE.		
	TOTAL.	Males.	Females.	TOTAL.	Males.	Females.
1881 . . . . .	103,437	53,235	50,202	74,865	47,204	27,661
1891 . . . . .	120,110	61,571	58,539	52,945	34,336	18,609
Variation . . . . .	+16,673	+8,335	+8,337	—21,920	—12,868	—9,052

Thus the indigenous population has increased by 16'12 per cent. or at the rate of 1'502 per cent. per annum, and the decrease is entirely confined to the immigrant population, which is 29'28 per cent. less now than in 1881. In that year the native-born population constituted only 58'01 per cent. of the total : in

1891 the percentage was 69'42. If we turn to the figures of the principal indigenous caste, *viz.*, the Kodagu or Coorg race, we find that there has been an increase of 20'63 per cent. Between 1871 and 1881 the Coorgs increased by only 2'44 per cent. Unfortunately it is not possible to compare the figures for other castes found only in Coorg, as in the 1881

Coorgs.			
Year.	TOTAL.	Males.	Females.
1891 . . .	32,611	16,527	16,084
1881 . . .	27,033	13,701	13,332
Variation . . .	5,578	2,826	2,752

tables these have been lumped together in a single group, which also includes some immigrant castes, or castes partly immigrant and partly native. Nor can I obtain any trustworthy results from a comparison of the occupation statistics, owing to the widely different systems of classifying and tabulating which were followed in 1881 and on the present occasion.

13. Further evidence in support of the view of Mr. Leggatt, the District Magistrate, is afforded by the age tables, which show a great increase in the population under 5, a state of things which is incompatible with a declining population. There is also an increase of more than 8 per cent. in the population over 40, and the decrease is confined to the numbers between the ages of 5 and 39. I should not have expected the falling off to appear at the early ages, but many immigrants evidently bring all except their very young children with them.

Age Statistics.

POPULATION UNDER 5.		
Year.	Males.	Females.
1891 . . . .	10,677	11,226
1881 . . . .	8,430	8,768
Increase . . .	2,247	2,458

14. It is clear from the figures that have been given that the native population of Coorg is a progressive one, and it further appears that its rate of growth is high when compared with that found in other parts of India. Mysore, Madras and Bombay suffered heavily from the famine of 1877-78, and the recovery from its effects has raised the rates of increase. Coorg was unaffected by that famine, and yet its indigenous population has increased at a rate less only than that found in Mysore.

The population a progressive one.

Increase per cent. since 1881.

Madras . . . . .	15'58
Mysore . . . . .	18'09
Bombay . . . . .	14'49
Bengal . . . . .	6'89
N.-W. P. and Oudh . . . . .	6'34
Punjab . . . . .	10'74
Assam . . . . .	12'19

Moreover, there is no reason to suppose that there is any real falling off in the numbers of immigrants, for between 1880-81 and 1890-91 the area under coffee has advanced by 15,491 acres or 32'79 per cent., while the acreage under rice, the only other widely cultivated crop, has also advanced. In 1881 there were 1,584 immigrants to every acre under coffee, and if this ratio had been maintained we should have had 99,410 immigrants in 1891 and the total population would have been 219,520, or 23'12 per cent. in excess of that of 1881. It is not, however, permissible to assume that the ratio between the acreage under coffee and the number of immigrants is a fixed one or even approximately permanent, but I think that it may be asserted with confidence that the ratio between indigenous and immigrant population, during the months that the latter is present, cannot

Cultivation of Coffee and Rice.

Year.	Coffee.	Rice.
	Acs.	Acs.
1890-91 . . . .	62,741	74,497
1880-81 . . . .	47,250	72,881
Variation . . .	+15,491	+1,616

6

have decreased since 1881, seeing how greatly the cultivation of coffee has advanced. On this hypothesis the normal population of Coorg, that is, the population during the months when the labourers are at work on the coffee estates, would be 207,051. This may be taken to be the minimum normal population and that given above (219,520) as the maximum. The actual number will lie somewhere between these two.

15. I give below the birth and death statistics for the ten official years which approximate most nearly to the period between the two enumerations :

Birth and Death Statistics.

*Registered Births and Deaths in Coorg.*

Year.	Births.	Deaths.	Excess of Births over Deaths.
1881-82 . . .	2,829	3,192	—363
1882-83 . . .	2,798	3,112	—314
1883-84 . . .	2,394	3,879	—1,485
1884-85 . . .	2,652	2,689	—37
1885-86 . . .	3,118	2,956	+162
1886-87 . . .	2,505	3,626	—1,121
1887-88 . . .	2,582	3,461	—879
1888-89 . . .	2,963	3,461	—498
1889-90 . . .	2,917	4,087*	—1,170
1890-91 . . .	2,719	4,515†	—1,796
TOTAL . . .	27,477	34,978	—7,501

In every year but one (1885-86) the deaths exceed the births and the total excess amounts to 7,501. In a country like Coorg, however, in which nearly half the population is immigrant, the birth and death statistics are of little use for the purpose of ascertaining the growth of the population. It is evident that the registration is defective, for both birth and death rates are much lower than those found elsewhere. On the other hand it must be remembered that a high proportion of the immigrant population consists of males who are unmarried or have not brought their wives with them. These, therefore, contribute nothing or very little to the births, while they are included in the population on which the birth rates are calculated; and as the deaths among these labourers help to swell the number of deaths it is intelligible that the latter should exceed the number of births. The Administration Reports do not give details of sex in the death returns, so I am not able to say how far the statistics support this view by showing an excess of male deaths.

16. In the case of a population so small as that of Coorg it is hardly necessary to give information for any area smaller than the whole province, but as the subject dealt with in this chapter presents unusual features, I give the figures for each taluk in the annexed table.

Taluk figures.

In Yelusavirashme, Padinalknád and Kiggatnád there has been an increase. The decrease is greatest in Mercára, then comes Yedenalknád, and lastly Nanjarájpata. I believe that coffee is most extensively grown in Mercára and Yedenalknád, so we should expect to find the decrease at a maximum in these two taluks. I have, however, no taluk statistics of coffee cultivation, so I cannot pursue this subject further. It may be, too, that the coffee season was earlier in some taluks than in others.

\* No epidemic; better registration.

† Influenza epidemic.

Comparative Statement of Population.

Punjab . . . . .	3,710'90	5,575'44	25'68	2'76	18'92	666'10	...	0'17	0'03

19. In the report on the Census of the Madras Presidency I have attempted  
to show that the Hinduism of its Dravidian  
Hinduism. population is nothing more than a thin  
vener of Puranic beliefs overlying a great mass of demonolatry, combined with  
the worship of tutelar deities of human origin. Mr. Rice's excellent account of  
the religion of the Coorg Hindus\* brings out the same facts very clearly, and the  
expression Hindu must, therefore, be understood as indicating only a partial and

\* Gazetteer of Mysore and Coorg, vol. III, pp. 258 et. seq.

not very living belief in the gods of the Brahman pantheon. This is the Hinduism which is professed by over 90 per cent. of the inhabitants of Coorg. There are 12 Hindus to one Musalman, and 46 to one Christian. The Musalmans are relatively more numerous than in Madras or Mysore, while only Madras has a higher proportion of Christians. It will be noticed that the apparent decrease in the population is entirely confined to Hindus.

20. The marginal statement gives statistics for each of the principal

*Hindu Sects.*

SECT.	NUMBER OF PERSONS RETURNING IT.		
	TOTAL.	Males.	Females.
Salvite . . .	1,08,987	60,274	48,713
Vaishnavite . .	21,531	11,681	9,850
Mādhva . . .	258	135	123
Lingayat . . .	8,553	4,124	4,429
Others . . .	17,516	9,843	7,673

Hindu sects. According to these figures Saivism is the predominant creed, and the same feature is found in the southern half of the Madras Presidency. The Saivism of both Coorg and Madras, however, is but little removed from the demon worship of the primitive Dravidians, and the sect returned merely indicates the particular class of Brahmanic deity to which formal

reverence is occasionally paid. The real worship of all classes except the Brāhmans and a few higher castes is reserved for the devils, the tutelar deities and the ancestral spirits. Of the 17,516 persons shown under 'Others' in the above statement 16,666 made no return of sect at all. The remaining 850 returned caste names for the most part.

21. The numbers returning each sect of Christians are given in Table A.

*Sects of Christians.*

Sect.	Number.	
	1891.	1881.
Roman Catholic . .	2,588	2,508
Church of England . .	305	392
Protestant . . .	152	...
Presbyterian . . .	65	35
Wesleyan . . .	49	51
Lutheran . . .	29	152
Unsectarian . . .	11	...
Baptist . . .	1	14
Others . . .	10	...
Not stated . . .	182	...
TOTAL . . .	3,392	3,152

The total number of Christians is 3,392, and of these 2,588 are Roman Catholics. In the marginal statement the figures are compared with those of 1881. In this statement members of the Church of Scotland and of the Free Church are included in Presbyterians. In the 1881 returns 152 persons are shown as "Others, Basel Mission": these have here been treated as Lutherans. At the recent Census 152 persons returned their sect as Protestant: there were none under this vague term in

1881, nor were there in that year any Christians who did not return their sect. In the 1891 table—Table A—it will be noticed there are 2 persons who returned their sect as Heathen: similar absurdities are found in the Madras return and no doubt in those of other provinces also. 'Sarveswaranamatha' is returned as their sect by three individuals. This expression means 'the religion of the Omnipresent Deity.' Table A also shows how many of the Christians are foreigners, how many Eurasians and how many natives. The Native Christians number 2,931, or 86·41 per cent. of the total. Of the Native Christians again, 2,460, or 83·93 per cent., are Roman Catholics; 71 are members of the Church of England; 46 are Presbyterians; 130 have returned themselves as Protestants simply, and 173 have made no return. The foreign Christians number 249, and of these 174 are members of the Church of England and only 16 are Roman Catholics. The Eurasian Christians number 212, and 112 of them are Roman Catholics and 60 are members of the Church of England.

CHAPTER IV.  
AGE AND SEX.  
(TABLE VII.)

## Age.

22. In the following statement I give the age-distribution of 10,000 persons of each sex according to the Census of 1881 and that of 1891, and I also add the corresponding figures for Madras and Mysore. The two sets of figures for Madras are respectively those based on the actual returns and those founded on the returns as adjusted by me:—

*Distribution by Age of 10,000 persons of each sex.*

TOTAL	10,000	10,000	10,000	10,000	10,000	10,000	10,000	10,000	10,000	10,000

In 1881 the proportions at all periods from 10 to 39 were higher than in 1891, and this I ascribe to the greater number of immigrant labourers present in the former year. A comparison of the figures for 1891 with those for other provinces shows that there was still a considerable body of these labourers in 1891. For an ordinary population that is not declining and is not affected by immigration or emigration, the numbers at each age should show a steady decrease. In Coorg, however, the maximum number is found at the age 25-29, and in 1881 this was the case with both sexes. In 1891 the female figures show a closer resemblance to the normal state of things, for the female immigrants are less numerous than the male, and comparatively few were present at the enumeration of 1891. For the reasons I have given in the Report on the Madras Census, the ages as returned cannot be accepted as correct, but the error is sufficiently constant to enable us to draw certain broad conclusions, the most important of which in the case of Coorg is that the immigrant population present at the Census of 1891 was much less than in 1881, a fact which has perhaps been sufficiently insisted upon.

23. It is not necessary to recapitulate in this volume the errors which vitiate the return of age, but I give below a statement showing the exact ages returned by 1,000 persons enumerated in all parts of the province :—

Errors in the returns.

			TOTAL .	522	478

The partiality for round numbers is most noticeable. This can be discounted to some extent by grouping the ages for all persons over 5 in decennial periods with the multiple of ten in the centre. The

Number in 10,000 in each decennial period after age 4.

Age.	Males.	Females.
0—4 . . .	1,114	1,455
5—14 . . .	2,087	2,376
15—24 . . .	2,081	2,152
25—34 . . .	2,309	1,922
35—44 . . .	1,372	1,069
45—54 . . .	678	596
55 and over . . .	359	430

high proportion of males between 15 and 34 is now very marked. The figure for the 35—44 period also is higher than it would be normally, while that at the next two periods is lower. The presence of large additional numbers at the middle ages of course affects *pro tanto* the proportions at the beginning and end of life. In the case of females the proportions at 15—34 are also higher than the normal, but the difference is not on the whole so great as among males for there are relatively fewer female immigrants. The number of foreign women labourers over 35 must be small.

24. For the Madras Presidency I have taken 15 as the age at which both males and females on an average cease to be dependent, and I have put the end of working life at 44 for females and 59 for males. Adopting the same ages for Coorg, we find that 65·71 per cent. of the males and 51·43 per cent. of the females are 'supporters.' These proportions are higher than in any other province owing to the presence of many foreign adult labourers in Coorg. They are lower than the proportions of 1881 as there were then more of these immigrants present. They approximate very closely to the figures for the Nilgiris, a district which resembles Coorg in many respects, and especially in requiring a large amount of foreign labour for the cultivation of special products.

Useful and dependent ages.

Percentage of Supporters.

	Males.	Females.
Coorg (1891)	65·71	51·43

3	1,082
4	1,018
TOTAL 0-4	1,051
5-14	916
15-24	832
25-34	670
35-44	626
45-54	707
55 and over	963
TOTAL	804

25. In the population of Coorg there are only 804 females to 1,000 males. In 1881 the corresponding number was 775. The marginal table shows the proportion in other provinces. In the Nilgiri District the ratio is 777 to 1,000, and the reason for the low proportion of females in this district and in Coorg is the predominance of males in the large body of immigrant labourers. This conclusion is strongly supported by the statistics showing the proportion at the different ages, for the preponderance of males is greatest between 25 and 44. It is, however, greater than would be expected at the later ages, and there has no doubt been some omission to return females. This error is found in the returns for the greater part of India and not in Coorg alone, and is due to a sentiment common to most oriental races. The following statement, which gives the proportion for each of the principal castes, shows that the excess of males is not confined to the immigrant castes:—

CASTE.	Number of Females per 1,000 Males.	Number of Wives per 1,000 Husbands.	CASTE.	Number of Females per 1,000 Males.	Number of Wives per 1,000 Husbands.
Kodagu	973	1,010	Máppilla	492	452
Gauda	903	971	Dévanga	956	964
Vakkaliga	742	649	Kuruba	848	859
Holeya	755	720	Sheik	786	802
Pále	502	477	Native Christian	853	795
Yerava	926	980	Lingáyat	983	865
Bráhmans	859	817			

Among Kodagus or Coorgs the proportion of females is fairly high, and the wives exceed the husbands in number. The only other caste in this statement that is essentially a Coorg caste is Yerava, and among these the husbands exceed the wives. This indicates an omission of wives and no doubt of other females also. There is not a single caste of any size in which the females exceed the males.

The proportions for people of each religion are given on the margin, but these

Religion.	Number of Females per 1,000 Males.
All Religions . . . .	804
Hindus . . . . .	823
Musalman . . . . .	603
Christians . . . . .	816
Others . . . . .	937

figures throw but little light on the question. They indicate, however, that Musalmans either omit to return their females to a greater extent than followers of other religions, or that they less frequently bring their womenkind with them. Probably both causes are at work.

CHAPTER V.  
CIVIL CONDITION.  
TABLES VIII AND E.

26. The following statement shows the civil condition of 10,000 persons of Statistics of Civil Condition for Hindus, each sex at each of certain age-periods. Musalmans and Christians, The figures are given for the whole population and for Hindus, Musalmans and Christians separately:—

*Statement showing the distribution, by civil condition, of 10,000 persons of each sex at each age-period.*

	Hindus . . .	367	8,572	1,061	10,000	137	4,549	5,314	10,000
	Musalman . . .	390	9,109	501	10,000	122	4,244	5,634	10,000
	Christians . . .	1,031	8,162	807	10,000	427	4,017	5,556	10,000
50 AND OVER .	All Religions . .	212	7,787	2,001	10,000	67	1,803	8,130	10,000
	Hindus . . .	198	7,731	2,071	10,000	72	1,883	8,045	10,000
	Musalman . . .	336	8,542	1,122	10,000	23	1,093	8,884	10,000
	Christians . . .	345	7,069	2,586	10,000	...	1,040	8,960	10,000

Of youths under 15 very few are married, but the proportion of the married is higher for Hindus than for persons of the other two religions. The proportion of married is lower than in most parts of India, and the difference is greater still in the case of girls under 15. It will be observed that the relative number of married girls and widows at this age is greater for Musalmans than for Hindus and Christians, but the absolute numbers are very small.

At the next age-period (15—24), the proportion of single males and females is still comparatively high, and it is evident that early marriage is less common in Coorg than elsewhere. Again, we find that Musalman females exhibit a greater tendency to marriage than their co-religionists, but the Hindus have a higher proportion of widows.

At the 25—39 period, the unmarried males constitute only 18·14 per cent. of the males at these ages. The proportion of widowers is higher than in Madras, Bengal, Bombay or Mysore. The females are nearly all married, but the proportion of single women is appreciably higher for Christians than for others.

Of the women at these ages as many as 20·70 per cent. are widows, a proportion that is exceeded only in Bengal and Mysore. It is clear that the custom of compulsory widowhood prevails largely in Coorg. It is curious to find the proportion higher for Christians than Hindus, but the number of Christians is comparatively small.

At the next period (40—49), the proportion of widowers is higher than in Madras, Bengal, Bombay or Assam, and the proportion of widows is higher than in any other part of India, being 53·43 per cent. of the total female population between the ages of 40 and 50. The proportion is higher for Musalmans and Christians than for Hindus.

At the last period (50 and over), the difference in the civil condition of the two sexes is most marked. Out of every 100 males 2 are single, 78 are married, and 20 are widowers; out of every 100 females 1 is single, only 18 are married, and no less than 81 are widows. In the case of Musalman women, only 11 are wives and 89 are widows, while of Christians 10 are married and 90 widowed. The proportion of widowed at these ages is high everywhere, but in no province is it so high as in Coorg.

27. The next statement shows the distribution by age of 10,000 persons in each civil condition.

*Statement showing the distribution by age of 10,000 persons of each sex in each civil condition.*

AGE-PERIOD.	MALES.				FEMALES.			
	Unmarried.	Married.	Widowed.	All Civil Conditions.	Unmarried.	Married.	Widowed.	All Civil Conditions.
0—4 . . .	2,084	10	5	1,114	3,413	17	5	1,455
5—9 . . .	2,146	12	...	1,146	3,247	32	5	1,388
10—14 . . .	1,738	39	11	941	2,062	270	27	988
15—19 . . .	1,655	246	89	988	893	1,530	157	1,031
20—24 . . .	1,230	988	382	1,093	200	2,330	485	1,121
25—29 . . .	698	2,017	1,035	1,277	82	2,284	799	1,104
30—34 . . .	255	1,971	1,277	1,032	37	1,466	1,211	818

40—44 . . .	51	1,211	1,481	605	21	606	1,628	526
45—49 . . .	19	732	1,013	364	6	271	930	276
50—54 . . .	13	599	1,282	314	5	195	1,471	327
55—59 . . .	5	244	616	131	2	63	534	115
60 and over . . .	9	378	1,573	228	5	75	1,695	315
<b>TOTAL</b> . . .	<b>10,000</b>	<b>10,000</b>	<b>10,000</b>	<b>10,000</b>	<b>10,000</b>	<b>10,000</b>	<b>10,000</b>	<b>10,000</b>

It will be seen that comparatively few males are married before they are 20 years old, while very few females remain unmarried after that age. Of the widowers 15·22 per cent. are under 30, while only 14·78 per cent. of the widows are below that age. In fact, there is not nearly so much difference between the ages of the widowers and widows as would have been expected, but as we have already seen, the proportion of widows far exceeds that of widowers.

28. The following statement shows the proportions of the widowed among those who have been married. It brings out in a very marked way the difference between the two sexes :—

Further statistics of widowed.

Proportion of married and widowed in a total (of both civil conditions) of 10,000 of each sex.

RELIGION.	MARRIED.		WIDOWED.		TOTAL.	
	Males.	Females.	Males.	Females.	Males.	Females.
All Religions .	9,171	7,113	829	2,887	10,000	10,000
Hindus . .	9,133	7,128	867	2,872	10,000	10,000
Musalman . .	9,563	7,064	437	2,936	10,000	10,000
Christians . .	9,109	6,776	891	3,224	10,000	10,000

29. The mean age of the married males is 36·21 years ; that of the married females is 28·32 years. The average difference, therefore, between the age of husband and wife is 7·89 years. The considerably younger average age of the wife accounts in part for the greater degree of the widowed state among females. In Madras the average age of husbands is 39·06 years and that of wives 28·98 years.

Mean age of the married.

30. The next statement gives the number of females to 1,000 males for each age and civil condition separately :—

Proportion of the sexes in each civil condition.

Statement showing the average number of females per 1,000 males of the same age and civil condition.

Ages.	Unmarried.	Married.	Widowed.	TOTAL.
0—14 . . . . .	608	3,938	7,833	963
15—24 . . . . .	243	2,401	4,714	832
25—39 . . . . .	89	639	2,978	644
40—49 . . . . .	244	347	3,539	662
50 and over . . . . .	285	210	3,678	905
All Ages . . . . .	641	768	3,447	804

The low proportion of wives to husbands at age 25 and upwards is partly due to the fact that many of the immigrant labourers are married men who have not brought their wives with them; but even without this disturbing factor, the wives would be less numerous than the husbands at these ages, as the wife is nearly always considerably younger than the husband. For the same reason the wives under 25 are much more numerous than the husbands.

31. Taking 15 to 39 as the period of child-bearing, we have the following interesting statistics:—

Wives at reproductive ages.

*Percentage of wives at reproductive ages.*

PROVINCE OR COUNTRY.	WIVES AT CHILD-BEARING AGE IN	
	10,000 of the total population (both sexes).	10,000 women of child-bearing age.
Coorg . . . . .	1,548	7,527
Madras . . . . .	1,637	8,068
Bombay . . . . .	1,698	8,699
Bengal . . . . .	1,617	8,168
N.-W. Provinces and Oudh . . . . .	1,708	8,903
Punjab . . . . .	1,707	8,585
England and Wales . . . . .	1,133	4,914

The proportion of married women of child-bearing ages to the total population is lower than in other provinces, but the difference is less than would have been expected considering the large excess of males. The lower proportion of married among women at the reproductive period of life must be due to the greater prevalence of widowhood in Coorg.

32. The following statement, based upon Table E, shows the distribution, by civil condition, of 10,000 persons of each caste, containing not less than 2,000 members. As age is an important factor in the statistics for females, I have, in the case of that sex, given the distribution for each age-group shown in the table:

Marriage statistics for different castes.

1216 76

The low proportion of the married among Kodagus, between 10 and 15, shows that marriage before puberty is rare with them. It is also fairly uncommon among the Kurubas, Native Christians, Vakkaligas and Lingáyats. It is, of course, most extensively practised by Bráhmans. The proportion of widows at 15 to 39 affords some indication of the extent to which the prohibition of the marriage of widows prevails. It is absolutely forbidden among Bráhmans and it is not usual, even if not prohibited, among Dévángas, Lingáyats and Vakkaligas. Among Yeravas, Kodagus, Kurubas and Páles it is both allowed and practised to a not inconsiderable extent.

CHAPTER VI.

INFIRMITIES.

TABLES XII TO XV AND XIA TO XVA.

33. The following statement gives the number of persons returned as afflicted with one of the four infirmities, regarding which statistics are collected at the Census; the figures of 1881 are added for comparison:—

*Number of infirm persons compared with 1881.*

Infirmity.		Total.	Males.	Females.
INSANITY	1891 . . . . .	44	25	19
	1881 . . . . .	37	23	14
	Variation . . . . .	+7	+2	+5
	Percentage of variation . . . . .	+18·92	+8·70	+35·71
DEAF-MUTISM	1891 . . . . .	126	77	49
	1881 . . . . .	175	109	66
	Variation . . . . .	—49	—32	—17
	Percentage of variation . . . . .	—28·00	—29·36	—25·76
BLINDNESS	1891 . . . . .	86	47	39
	1881 . . . . .	162	92	70
	Variation . . . . .	—76	—45	—31
	Percentage of variation . . . . .	—46·91	—48·91	—44·29
LEPROSY	1891 . . . . .	23	12	11
	1881 . . . . .	43	25	18
	Variation . . . . .	—20	—13	—7
	Percentage of variation . . . . .	—46·51	—52·00	—38·89

One person in every 3,933 is insane, one in every 1,373 is a deaf-mute, one in every 2,012 is blind, and one in every 7,524 is a leper.

The returns show an increase of insanity and a decrease of deaf-mutism, blindness and leprosy. The percentage variations are high, but the absolute figures are so small that much importance cannot be attached to percentages. Though the returns of both years are undoubtedly imperfect, there is no reason to suppose that the degree of error was greater in 1891 than in 1881, and the general improvement shown by the later enumeration may be accepted as a real improvement.

34. The number of insane persons is 44 or 254 in a million. The annexed

*Insanity.—Comparison with other provinces.*

PROVINCE.	NUMBER OF INSANES IN 10,000 OF THE POPU- LATION.		
	Total.	Males.	Females.
Coorg . . .	2.54	2.61	2.46
Madras . . .	2.16	2.53	1.79
Assam . . .	5.52	6.16	4.84
Bengal (1881) . . .	4.44	5.31	3.57
Bombay (1881) . . .	4.71	6.05	3.29
Burma . . .	8.91	9.76	8.26
Central Provinces (1881) . . .	2.19	2.84	1.53
North-West Prov- inces and Oudh . . .	1.19	1.58	0.77
Punjab . . .	3.02	3.76	2.16
Mysore . . .	2.20	2.53	1.87
England and Wales (1881) . . .	...	31	33
Scotland (1881) . . .	...	38	39
Ireland (1881) . . .	...	38	34
Italy (1881) . . .	...	8	6
Austria (1881) . . .	...	22	19
Hungary (1881) . . .	...	22	18
United States of America (1881) . . .	...	35	32

table shows the extent of insanity in other parts of India and in some European countries. It will be seen that the degree of insanity in Coorg is not high. In most countries this malady is much more common among males than among females, but in Coorg the difference in the figures for the two sexes is slight.

*Age-distribution.*

age-distribution of the insane population.

35. The next statement gives the

*Distribution, by age, of 100 persons of each sex who are insane.*

*Number of insanes in 10,000 persons of each age and sex.*

TOTAL . . .	100	100	TOTAL . . .	2.61	2.46

The figures are somewhat irregular, but this must be expected when the total figures are so small. The most noticeable features are the absence of any insane persons among the population under five, and the high proportion at the 15—19 period for males and at the 10—14 period in the case of females. In Madras the percentage steadily rises up to the 30—34 period and then begins to decline. The second part of the above statement shows that insanity is most common in the case of males at the 40—44 age-period, and in the case of females at the 55—59 period. In Madras the proportion is highest for males at 30—34 and for females at 45—49.

36. Table XII-A gives the caste of the insane persons: 10 of them are Kodagus or Coorgs and 7 are Holeyas, but in no other case does the number exceed 4. The Coorgs have one insane

Coorg.

person in every 3,261, the Holeyas one in every 3,441, and the Gaudas one in every 3,331. The proportions for the other castes are of little value as the numbers are so small. Thus there are 62 Jains and one is insane, but it would be absurd to suppose that this is the normal rate of insanity among members of that community.

Deaf-mutism : comparison with other provinces.

PROVINCE OR COUNTRY.	NUMBER OF DEAF-MUTES IN 10,000 OF THE POPULATION.

United States of America (1881) . .	...	7	6

37. The total number of deaf-mutes is 126, or 728 in a million. The following table gives the proportions in other provinces and countries. Deaf-mutism is slightly more prevalent in Coorg than in Mysore, and slightly less prevalent than in Madras. In the adjoining district of South Canara, there are 532 deaf-mutes per million and in Malabar only 185.

In all countries this affliction appears to be more common among males than females, and Coorg is no exception to this rule.

Age-distribution of deaf-mutes.

38. The subjoined statement gives particulars of the age-distribution of the deaf-mutes.

Distribution, by age, of 100 deaf-mutes of each sex.      Number of deaf-mutes in 10,000 persons of each age and sex.

AGE.	Males.	Females.	AGE.	Males.	Females.
0—4 . . .	...	6	0—4 . . .	...	2.67
5—9 . . .	12	10	5—9 . . .	8.19	4.67

55—59 . . .	...	4	55—59 . . .	...	22.50
60 and over . . .	...	2	60 and over . . .	...	4.12
TOTAL . . .	100	100	TOTAL . . .	8.03	6.35

The infirmity is most common among males between the ages of 10 and 25, but in the case of females the greatest degree of prevalence is at the 55—59 period. The male statistics correspond with those for Madras, but in that province the age of greatest prevalence is 20—24 for males and 15—19 for females. The Coorg statistics for females are very irregular, but, as I have already explained, this must be expected when the absolute figures dealt with are so small.

39. The Holeyas have the largest number of deaf-mutes (23) and the Coorgs come next with 21. Among the Kurubas there are 15 and among the Vakkaligas 9.

Caste of deaf-mutes.

40. The total number of blind persons is 86 or 497 in a million. The pro-

Blindness: Comparison with other provinces.

country for which I have statistics.

*Number of blind persons in 10,000 of the population.*

PROVINCE.	TOTAL.	Males.	Females.
Coorg . . .	4'97	4'90	5'06
Madras . . .	10'22	10'05	10'39
Assam . . .	10'65	10'75	10'54
Bengal (1881) . .	14'13	13'74	14'52
Bombay (1881) . .	26'59	23'95	29'41

Scotland (1881) . .	...	9	8
Ireland (1881) . .	...	11	12
Italy (1881) . . .	...	8	7
Austria (1881) . .	...	10	8
Hungary (1881) . .	...	13	13
United States of America (1881) . .	...	10	9

portion is much lower than in any other province of India or in any European country. In Travancore, however, the proportion is somewhat lower. It will be noticed that in Coorg blindness is more common among females than among males. This feature is also found in most of the Indian provinces, but of European countries Ireland alone has a greater degree of blindness among females than among the opposite sex.

Age-distribution.

41. The following statement gives age statistics for the blind :—

*Distribution, by age, of 100 blind persons of each sex.*

*Number of blind persons in 10,000 of the population of each sex at each age.*

Age.	Males.	Females.	Age.	Males.	Females.
0—4 . . .	6	10	0—4 . . .	2'81	3'56
5—9 . . .	11	5	5—9 . . .	4'55	1'87
10—14 . . .	6	13	10—14 . . .	3'33	6'56
15—19 . . .	11	3	15—19 . . .	5'28	1'26
20—24 . . .	2	5	20—24 . . .	0'95	2'31
25—29 . . .	15	3	25—29 . . .	5'71	1'47
30—34 . . .	6	...	30—34 . . .	3'03	...
35—39 . . .	6	5	35—39 . . .	4'08	4'81
40—44 . . .	15	20	40—44 . . .	12'07	19'63
45—49 . . .	9	10	45—49 . . .	11'47	19'31
50—54 . . .	9	8	50—54 . . .	13'28	11'89
55—59 . . .	0	5	55—59 . . .	...	22'50
60 and over . . .	4	13	60 and over . . .	9'14	20'58
TOTAL . . .	100	100	TOTAL . . .	4'90	5'06

The age-distribution differs considerably from what is found elsewhere. In Madras, for example, 30 per cent. of the blind males and 38 per cent. of the blind females are not less than 60 years of age: in Coorg the proportions are only 4 and 13 per cent., respectively. This is no doubt in part due to the peculiar age constitution of the people of Coorg, where the relative numbers in early middle life are much higher than in Madras, but this is not a complete explanation; for the prevalence of blindness is not so high among persons of 60 years of age and upwards as at some of the earlier age-periods. There is, however, a sudden increase in the degree of blindness at age 40, and the figures for this and the subsequent periods are markedly higher than for ages below forty. This is especially the case with females.

42. Table XIV-A shows the caste of the blind. Among Coorgs one in every 2,508 is blind, among Vakkaligas one in every 2,071, among Holeyas one in

Blindness in different castes.

Coorg.

every 1,720, among Gaudas one in every 1,666, and among Yeravas one in every 1,184. The other figures are small.

43. There are only 23 lepers or 133 in a million. This is a lower proportion than that found in any other Indian province. In Madras, there are 354 lepers in every million, and in the South Canara district as many as 867. In Mysore, it is true, there are only 165, but Mysore differs widely in climate from Coorg, and in a tract with such a heavy rainfall I expected to find the disease more common. It must be admitted, however, that our census of lepers is very imperfect, and the omission of a few individuals would largely affect the proportion for a population so small as that of Coorg.

Leprosy : Comparison with other provinces.

No. of Lepers in 10,000 of the population.

PROVINCE.	Total.	Males.	Females.
Coorg . . .	1'33	1'25	1'43
Madras . . .	3'54	5'36	1'76
Assam . . .	12'28	18'19	6'02
Bengal (1881) . .	8'09	12'20	4'02
Bombay (1881) . .	6'14	8'74	3'36
Burma . . .	8'37	11'69	5'14
Central Provinces (1881) . . .	5'58	7'60	3'52
N. W. Provinces . .	3'60	5'74	1'30
Punjab . . .	2'09	2'95	1'07
Mysore . . .	1'65	2'19	1'10

44. I give the age-distribution of the lepers ; but as the total number is only 23, these figures are of very little value, and it is not necessary to discuss them. One curious feature in the returns, however, is that while in every other province leprosy is shown by the census to be much more common among males than females, the reverse is the case in Coorg, where the proportions are 125 lepers out of every million males and 143 out of every million females.

Age-distribution.

Distribution, by age, of 100 Lepers of each sex.      Number of Lepers in 10,000 persons of each sex and age.

Age.	Males.	Females.	Age.	Males.	Females.
0-4 . . .	8	...	0-4 . . .	0'94	1'...

45-49 . . .	...	...	45-49 . . .	...	...
50-54 . . .	8	19	50-54 . . .	3'32	7'92
55-59 . . .	...	...	55-59 . . .	...	...
60 and over . . .	...	...	60 and over . . .	...	...
TOTAL . . .	100	100	TOTAL . . .	1'25	1'43

45. The statistics given in Table XV. A show that 8 of the 23 lepers belong to the Yerava caste, a forest tribe now largely employed as labourers. Possibly these people are less unwilling than their more civilized neighbours to admit the existence of leprosy, but the proportion (one leper in every 1,776) is not so high as is found in many Madras castes. No other caste has returned more than two lepers.

Leprosy in different castes.

## CHAPTER VII.

## EDUCATION.

## TABLES IX AND C.

46. The following is an abstract of the education statistics for the population taken as a whole :—

	Total Males.	Total Females.	PERCENTAGE, 1891.		PERCENTAGE, 1881.	
			Males.	Females.	Males.	Females.
Pupils . . . .	4,155	605	4'36	0'79	4'25	0'55
Literates . . . .	10,679	671	11'22	0'88	8'80	0'46
Illiterates . . . .	80,399	75,297	84'42	98'33	86'95	98'99
Not stated . . . .	674	575	Distributed.		...	...
TOTAL . . . .	95,907	77,148	100'00	100'00	100'00	100'00

There has been an improvement in the decade, but some of this must be ascribed to the smaller number of labourers, mostly illiterate, who were present at the enumeration of 1891.

Education by age and religion.

47. The next statement gives the education statistics combined with particulars

of age and religion :—

Age.	INSTRUCTION.	ALL RELIGIONS.		HINDUS.		MUSALMANS.		CHRISTIANS.	
		Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.

	Illiterate . . . .	75'82	96'08	75'67	96'43	80'71	96'63	61'16	78'91
	TOTAL . . . .	100'00	100'00	100'00	100'00	100'00	100'00	100'00	100'00
15-24	Learning . . . .	2'90	0'12	3'02	0'09	1'32	0'20	4'63	1'26
	Literate . . . .	15'70	1'86	14'79	1'53	20'49	1'31	35'15	18'87
	Illiterate . . . .	81'40	98'02	82'19	98'38	78'19	98'49	60'22	79'87
	TOTAL . . . .	100'00	100'00	100'00	100'00	100'00	100'00	100'00	100'00
25 and over.	Learning . . . .	0'03	0'01	0'03	0'01	0'05	0'00	0'00	0'15
	Literate . . . .	16'16	0'87	14'57	0'49	22'61	1'15	51'62	15'73
	Illiterate . . . .	83'81	99'12	85'40	99'50	77'34	98'85	48'38	84'12
	TOTAL . . . .	100'00	100'00	100'00	100'00	100'00	100'00	100'00	100'00

The lowest proportion of illiterate is found amongst the Christians, of whom nearly half the males and a quarter of the females can read and write. The

Musalmans are more educated than the Hindus, but the difference in the case of the females is small. The relation between the different religions was much the same in 1881:—

*Percentage of Pupils, Literates, and Illiterates in 1881, for each religion.*

RELIGION.	MALES.			FEMALES.		
	Learning.	Literate.	Illiterate.	Learning.	Literate.	Illiterate.
Hindus . . .	4.21	7.70	88.09	0.46	0.20	99.34
Musalmans . . .	3.87	14.11	82.02	0.75	0.64	98.61
Christians . . .	8.11	40.34	51.55	4.50	12.86	82.64

Turning now to the age figures we find that, out of 20,006 boys between the ages of 5 and 14, which may be taken as the school-going period, only 3,566, or 17.82 per cent., are at school; and out of 18,328 girls of the above ages only 583, or 3.18 per cent., are being educated. Taking a smaller period, namely 5—9, the proportions are 15.42 per cent. for boys and 3.44 per cent. for girls. Of the population over 15, one in every 6 males and one in every 83 females is able to read and write. Female education, indeed, is practically non-existent except among the Christians. 121676

48. The following statement gives the percentage of illiteracy among every caste with a strength of not less than 200:—

Diffusion of education.

*Percentage of illiterates among castes with a population of 200 and over.*

CASTE.	Males.	Females.	CASTE.	Males.	Females.

Dévanga . . .	72.07	98.87			

The Europeans show the greatest degree of education, but the majority of them are adults. The Eurasians come next with a very low proportion of illiterates in both sexes. Then come the Bráhmans and the so-called Vaisyas, but with them the education of females is very backward, more so indeed than among the Vellálas. The Coorg males are fairly educated, but only four in a hundred of their women can read and write. About half of the males of the Kaniya (Astrologer) caste are educated, but not a single one of their females is returned as a literate. All the Adiyáns, Kudiyas, Oddes, and Médaras are illiterate, and the Páles and Holcyas are not in a much better position.

The Labbais are the most educated of the Musalman sections, and the Máppillas the least. A comparatively large number of Native Christian males are educated, but the statistics for females are less satisfactory.

49. There are 10,679 male literates, and of these 717, or 6·71 per cent., can read and write English. Among females there are 671 literates and 102 of these, or 15·20 per cent., have a literary acquaintance with English. But these figures include the Europeans and Eurasians: if they be excluded, the number of English-knowing people is 518 males and 8 females. In other words, only one in every 185 males, and one in every 9,620 females, can read and write English. In Madras, the proportions are one in 255 for males and one in 7,056 for females. Of the eight females, six are Native Christians, one is an Armenian and the other is a Kodagiti. Of the 518 males, 249 are Kodagus, 95 are Bráhmans, 58 are Native Christians, 29 are Vellálas, 11 are Banajigas, and the rest are distributed over a number of castes. I should explain that the above figures do not include pupils who can read and write English.

50. In the following statement the statistics of education in Coorg are compared with those for other provinces:—

*Statistics of education in different provinces.*

PROVINCE.	NUMBER IN 10,000.					
	MALES.			FEMALES.		
	Learning.	Literate.	Illiterate.	Learning.	Literate.	Illiterate.
Coorg . . .	436	1,122	8,442	79	88	9,833
Madras . . .	330	1,158	8,512	33	67	9,900
Assam . . .	175	581	9,244	13	22	9,965
Bengal (1881) .	300	590	9,110	11	18	9,971
Bombay (1881) .	319	792	8,889	23	41	9,936
Burma . . .	587	3,908	5,505	49	240	9,711
N.-W. Provinces and Oudh . . .	98	517	9,385	4	17	9,979
Punjab . . .	141	601	9,258	8	19	9,973
Mysore . . .	246	807	8,947	26	47	9,927

It will be seen that the proportion of illiterate in Coorg is lower than in any other province except Burma, and this is true of both males and females.

volume on the Madras Census. *Konkani* is a dialect of Maráthi. *Koraga* I believe to be a dialect of Tulu; its character is briefly discussed in the Madras Report. *Kurumba* is a dialect of Kanarese. *Yerukala* or *Korava* is a dialect of Tamil.

Lingulstic classification.

53. In the following statement the languages returned are arranged by linguistic families and groups, dialects being separated from languages:—

Family.	Group.	Language.	Dialect.	POPULATION RETURNING IT.		
				Total.	Males.	Females.
		I.—Indian Languages.				
Aryan	Iranic	Pashtu	...	10	7	3

54. In many cases the names of castes and tribes were entered in the parent-tongue column and much difficulty was experienced in determining whether the particular section had or had not a dialect of its own. The following statement shows how all entries not appearing in the table were dealt with:—

Parent-tongue returned in the schedule.	Language with which included in Table X.
Adiya . . . . .	Malayálam.
Ándhra . . . . .	Telugu.
Bálabund . . . . .	Maráthi.
Bettakuruba . . . . .	Kurumba.
Bhatkal . . . . .	Konkani.

Urudu . . . . .	Hindustáni.

CHAPTER IX.  
BIRTHPLACE.

TABLE XI.

55. The birthplace statistics are given in Table XI. In the following statement they are arranged somewhat differently so as to bring out more clearly the nature of the immigration into the province :—

*Statement showing the distribution of Population by Birthplace.*

BIRTHPLACE.	POPULATION.			Percentage on Total Population.
	TOTAL.	Males.	Females.	
A.—District of enumeration . . . .	120,110	61,571	58,539	69'42
B.—CONTIGUOUS DISTRICTS, ETC. {	Malabar . . . .	10,308	7,511	5'96
	South Canara . . . .	12,432	8,907	7'19
	Mysore . . . .	25,139	14,413	14'53
Total . . . .	47,879	30,831	17,048	27'68
C.—PROVINCES AND STATES IN INDIA. {	Madras . . . .	3,749	2,480	2'17
	Bombay (British Territory) . .	783	664	0'45
	Other Provinces and States . .	319	209	0'18
Total . . . .	4,851	3,353	1,498	2'80
D.—Countries in Asia beyond India . . . .	42	24	18	0'03
E.—Countries outside Asia . . . .	128	97	31	0'07
GRAND TOTAL . . . .	173,010	95,876	77,134	100'00

Of the total population, only 69'42 per cent. were born in the province, a proportion much lower than that found elsewhere. To find a parallel we have to turn to the figures of the Nilgiri District where the home-born population is only 59'31 per cent. But for the fact that the coffee season of 1891 was an early one, and many of the immigrant labourers had returned to their homes by the date of the census, the proportion of foreigners would have been even higher. In 1881 the proportion of foreigners was 41'99 per cent. as against 30'58 per cent. in 1891.

56. The immigrants, however, do not come from afar, for 13'15 per cent. out of the total of 30'58 per cent. were born in the adjoining British districts of Malabar and Canara and 14'53 per cent. in the neighbouring Mysore State; and of the remaining 4,851 from Provinces or States in India, 3,749 hail from the Madras Presidency. Bombay sends 783, and the numbers from other parts of India are altogether insignificant. The figures for countries beyond India are too small to call for notice.

57. In the native population of Coorg there are 951 females to 1,000 males, but among the immigrants the ratio is 542 to 1,000. This great excess of males shows

Sex of immigrants.

that the immigration is one of labour. In most districts of Madras the immigrants are wives brought from across the border, and this is indicated by the predominance of females. Out of the 18,595 females who were enumerated in Coorg but born elsewhere, 10,726 are natives of Mysore, and some of these, no doubt, are wives of husbands permanently resident in Coorg.

58. I give in the marginal statement particulars of the residence at the time of the census of those natives of Coorg who were enumerated in other parts

Natives of Coorg enumerated elsewhere.

*Natives of Coorg enumerated elsewhere.*

Born in Coorg and enumerated in	Total.	Males.	Females.
Assam . . .	...	...	...
Bombay . . .	21	11	10
Burma . . .	...	...	...
Madras . . .	642	373	269
Madras Feudatories .	13	10	3
Mysore . . .	1,607	699	908
North-West Provinces	7	2	5
Feudatories	...	...	...
Punjab . . .	29	24	5
Feudatories .	5	4	1

of India. The statement is not complete, as I have not received information for all provinces. Mysore and Madras are the only territories in which the Coorgs are at all numerous, and a considerable proportion of the natives of Coorg found there are probably children of Mysore and Madras parents who had gone to Coorg as labourers. The excess of females in the figures for Mysore indicates a slight degree of intermarriage between the people of that state and the inhabitants of Coorg.

## CHAPTER X.

## CASTES, TRIBES AND RACES.

59. As an account of the castes and tribes of Coorg was compiled so recently as 1887 by the Revd. G. Richter,<sup>1</sup>

Detailed notice unnecessary.

I do not propose to attempt any detailed notice of them. This is the less necessary, too, as most of the castes which appear in the tables are found in Madras, Mysore or elsewhere. The Kodagu or Coorg caste is in fact the only one of any considerable size which is confined to the province, and it numbers only 32,611 persons. I give below a list of the castes and tribes which appear to be peculiar to Coorg :

Caste.	Strength.	Caste.	Strength.
Kápála . . . . .	150	Vádári . . . . .	27
Kodagu . . . . .	32,611	Pále . . . . .	4,045
Ayyambokkalu . . . . .	4	Yerava . . . . .	14,209
Binepatta . . . . .	101	Mukkáti . . . . .	23
Kárgóli . . . . .	7	Áyiri . . . . .	1,007
Kávudi . . . . .	37	Kutuma . . . . .	74

There are also a number of caste names returned by only one or two persons which are not found in other lists, but many of these are probably not real castes at all. Such entries have been classified by the occupations returned at the census.

The classification of some of the castes is of doubtful accuracy. The *Kápálas*, for example, were formerly the watchmen and palace guards of the Coorg Rájas, but Mr. Richter says they are scarcely to be distinguished from the Páles or Páleyas, and that they originally came from Malabar.<sup>2</sup> The *Binepattas* again seem to have originally been mendicants<sup>3</sup>; they were classed as agriculturists on information furnished by the Commissioner of Coorg. *Kávudi* was originally classed as a barber caste (Malayálam *Kávutiyan*), but the Commissioner informed me they were agriculturists. He has possibly confused it with *Kavádi*, *Kávadi* or *Kavadi*, which I have classed as shepherds. *Vádári* is perhaps a mistake for *Vaddar* (*Odde*), but agriculture was returned as the occupation. *Agnáni*, "unenlightened," is a fairly common name for non-Christian pariahs, but as it was impossible to say whether they were Holeyas or Paraiyans, I was obliged to retain the name in the tables though it is not that of a distinct caste. Some of these Agnánis, it will be seen, have returned Christianity as their religion. *Anekula* and *Bákuda* are, I believe, merely sub-divisions of Holeyas, but the former is also a sub-division of Vakkaliga and the latter of Pále. *Káládi* is, no doubt, the same as the *Káláti* of the Madras tables. *Máyila*, *Méra* and *Parava* are sub-divisions of Holeyas. *Betta* is a sub-division of Kurumba, and ought to have been included with that caste. It would have been better, however, to have separated all the Betta Kurumbas and shown them in Group 4, but this

<sup>1</sup> *Ethnographical Compendium of the Castes and Tribes found in the Province of Coorg*, by the Revd. G. Richter, late Inspector of Schools in Coorg.

<sup>2</sup> Richter, *op cit*, p. 8.

<sup>3</sup> Richter, p. 16.

was not possible. *Magadava* (from *magga*, a loom) might perhaps have been clubbed with Bilimagga. *Golla* was classed as a shepherd caste as in the Madras tables, but the Gollas of Coorg appear to be mostly cow-keepers. *Heggades*, though now agriculturists, were formerly shepherds : the sub-divisions show this. Some of the *Kurumbas* are forest tribes like the Kurumbas of the Nilgiris and the Wynaad. *Biruva* was classified on information furnished by the Commissioner ; the name is probably merely another form of Billava. Of the 14 castes, in Group 55, which have been left unclassified, *Bandāra* is possibly the same as Bhandāri, a Canara toddy-drawing caste, and *Kurchi* may be Korchā or Korachā, a Canarese name for Koravas or Yerukalas ; another Canarese name for them is Korama.

Sub-divisions.

60. As explained in the Madras Census Report, the return of sub-divisions is imperfect. An index showing the sub-divisions returned by each caste is appended to the tables.

## CHAPTER XI.

## OCCUPATIONS.

## (TABLES XVIII AND XVIIIIC.)

61. The distribution of the people according to their occupations or their means of subsistence is given in Table

Introductory.

XVII. This table is divided into two

parts. Part (A) gives the number of persons who follow each occupation in towns as well as in villages, with details of their sex and age. Part (C)<sup>1</sup> contains statistics of persons who combine agriculture with other occupations. These latter have been shown in Part (A) under their respective non-agricultural occupations. Every person who made any return is shown under the occupation which he exercises or upon which he depends for his means of subsistence. Thus, the item "Pleader" includes not only actual pleaders themselves but also their wives and children, for the latter depend upon that occupation for their support. In 1881 only the persons actually exercising a profession were shown under it, and this radical difference in the nature of the returns renders any general comparison of the statistics with those for 1881 impossible.

62. The annexed statement shows the number of persons in every 10,000 of the population who follow each of the seven main classes of occupations.

The Statistics examined.

Taking the province, as a whole, 72·72 per cent., or nearly three-fourths, are dependent for their livelihood on pasture and agriculture, and a little over one-tenth on the preparation and supply of material substances. Indefinite occupations support 7·47 per cent. of the population, and personal services 2·39 per cent. Government employés with their families form 2·20 per cent., and the professions come next with 1·83 per cent. Commerce comes last with only 1·69 per cent.

Class.	TOTAL.	Town.	Country.
A . . .	220	712	172
B . . .	7,272	2,047	7,786
C . . .	239	672	197
D . . .	1,170	3,927	899
E . . .	169	605	126
F . . .	183	543	147
G . . .	747	1,494	673
TOTAL .	10,000	10,000	10,000

63. In the case of the rural population the proportions are practically the same as those for the whole province, but the proportions for the urban population

differ considerably. About 39 per cent. of the inhabitants in towns, or nearly two-fifths, derive their support from the preparation and supply of material substances, and only one-fifth are dependent on Pasture and Agriculture. About 15 per cent. are engaged in indefinite occupations, and a little over 7 per cent. are Government employés and their dependents. Personal service stands next on the list with 6·72 per cent., and Commerce follows close with 6·05 per cent. The professions come last with but 543 followers in every ten thousand.

Proportions between the sexes.

Number of females per 1,000 males.	
Class A. Government . . .	655
" B. Pasture and Agriculture . . .	850
" C. Personal and Household Services . . .	919
" D. Preparation and Supply of Material Substances . . .	678
" E. Commerce . . .	251
" F. Professions . . .	585
" G. Indefinite Occupations . . .	840

64. The proportions between the sexes in each class are given in the marginal statement. The males preponderate in every class, and especially so in class E, where they are nearly four times as numerous as the females.

<sup>1</sup> For most provinces there is a third part—Part B.—which gives the occupation statistics for each district. In Coorg there are no districts.

CLASS A.—GOVERNMENT.

65. This class is divided into three orders: (1) Administration, (2) Defence, and (3) Foreign and Feudatory State Service. It contains 3,811 persons,

Class A.—Government.

nearly all of whom are engaged in the civil administration, the number of persons employed in the defence of the country and in Foreign State Service being only ten and one respectively. Of the 3,800 persons connected with the administration of the province, 1,946 are engaged in the service of the Imperial and Provincial Governments, 62 are in Municipal Service and the rest are village servants. Among village servants again, 1,207 persons are shown as non-agricultural village headmen. I doubt the accuracy of this, as nearly every village officer has some connection with the land.

CLASS B.—PASTURE AND AGRICULTURE.

66. This class contains two orders: IV—Provision and Care of Cattle, and V—Agriculture.

Class B.—Pasture and Agriculture.

67. Order IV contains 1,249 persons, or 0·72 per cent. of the total population. Of these, 1,123 are herdsmen, 46 are sheep and goat-breeders, and 43 are farriers and gelders.

Order IV.—Provision and Care of Cattle.

68. The next Order—Agriculture—is divided into four sub-orders, the proportional strength of each of which is shown in the margin. Land-owners and tenants form the large majority and constitute 60·03 per cent. of the total of the order. The number of non-cultivating land-occupants is only 2,688, while the cultivating occupants number 23,124. This is satisfactory, in so far as it shows that the majority of those who own land are also directly engaged in actual cultivation. Cultivating tenants number 48,867, and are nearly twice as numerous as land-occupants. Of the total number

Order V.—Agriculture.

of labourers, 25,313 are field labourers and 21,756 farm-servants, *i. e.*, labourers employed throughout the year. Growers of special products and trees number 2,735, or 2·19 per cent. of the agricultural population. The majority of these are engaged in the planting industry, but the item 'Planters' includes Superintendents, Agents, Overseers, Maistries, etc. I give the details in the marginal statement, but the return is obviously imperfect, as the number of females who are actually planters themselves and not merely dependent on planters, cannot be so high as 635, while the number of 'dependent' females must be greater than 13. The mistake has arisen from the failure of the enumerators or the householders who filled up the schedule to distinguish between the terms 'planter' and 'planter dependent.' In 1881, the number of male coffee-planters was 208, so that

*Agricultural population.*

Sub-order.	Actual strength.	Percentage on total of order.
Interest in land . . .	74,791	60·03

Growers of special products and trees . . .	2,735	2·19
Agricultural training and supervision . . .	2	...
TOTAL . . .	124,537	100·00

of labourers, 25,313 are field labourers and 21,756 farm-servants, *i. e.*, labourers employed throughout the year. Growers of special products and trees number 2,735, or 2·19 per cent. of the agricultural population. The majority of these are engaged in the planting industry, but the item 'Planters' includes Superintendents, Agents, Overseers, Maistries, etc. I give the details in the marginal statement, but the return is obviously imperfect, as the number of females who are actually planters themselves and not merely dependent on planters, cannot be so high as 635, while the number of 'dependent' females must be greater than 13. The mistake has arisen from the failure of the enumerators or the householders who filled up the schedule to distinguish between the terms 'planter' and 'planter dependent.' In 1881, the number of male coffee-planters was 208, so that

*Statistics of Planters.*

Name of occupation.	Population.		
	TOTAL.	Males.	Females.
Planters . . .	1,429	794	635
Do. "Dependent" . . .	60	47	13
Maistries . . .	590	512	78
Overseers . . .	15	7	8
Superintendents . . .	17	9	8
Agents . . .	105	75	90
Managers . . .	7	5	2
Inspectors . . .	2	1	1
Supervisors . . .	1	1	...
TOTAL . . .	2,286	1,451	835

after making all allowance for some under-statement in 1881 there has evidently been a considerable increase in the number of persons engaged in this industry.

69. The total agricultural population of the province is 124,597 according to Table XVIIA. Adding to this the number of persons who combine agriculture with other occupations, we have 129,234 persons, or 74·68 per cent. of the population, who are either wholly or partially dependent for their livelihood on agriculture.

### CLASS C.—PERSONAL SERVICES.

70. This class contains 4,139 persons, of whom 3,976 are engaged in personal and domestic service, Barbers number 711, washermen 1,390, cooks 706, and in-door servants 813. Among in-door servants the females predominate as would be expected.

### CLASS D.—PREPARATION AND SUPPLY OF MATERIAL SUBSTANCES.

71. This class comprises eleven orders, and the proportion borne by each of them to the total population is given below :—

Class D.—Preparation and Supply of Material Substances.

Order.	Percentage on total population.
VII.—Food and Drink . . . . .	5·62
VIII.—Light, Firing and Forage . . . . .	0·30
IX.—Buildings . . . . .	0·38
X.—Vehicles and Vessels . . . . .	0·02
XI.—Supplementary Requirements . . . . .	0·19
XII.—Textile Fabrics and Dress . . . . .	1·15
XIII.—Metals and Precious Stones . . . . .	1·59
XIV.—Glass, Pottery and Stone Ware . . . . .	0·49
XV.—Wood, Cane and Leaves, etc. . . . .	1·73
XVI.—Drugs, Gums, Dyes, etc. . . . .	0·01
XVII.—Leather, Horns, Bones and Grease . . . . .	0·22
<b>TOTAL</b> . . . . .	<b>11·70</b>

72. Order VII.—Food and Drink—is by far the largest, nearly 6 per cent. of the entire population of the province being supported by it. It is divided into three sub-orders : (17) Animal Food, (18) Vegetable Food, and (19) Drink, Condiments and Narcotics. Persons engaged in the preparation and supply of vegetable food number 3,344. Of these, 2,274 are grain dealers and 684 are confectioners and sweetmeat makers or sweetmeat pedlars. The main items in sub-order 19 are toddy drawers and sellers (1,646), grocers and general condiment dealers (1,305), betel-leaf and areca-nut sellers (870) and coffee preparers and sellers (772). The keeper of the ordinary *chellara bazaar* has been classed as a grocer and general condiment dealer.

The only other orders in this class which have any considerable number of followers are :—

XII.—Textile Fabrics and Dress,

XIII.—Metals and Precious Stones, and

XV.—Wood, Cane and Leaves.

73. The first order comprises four sub-orders, of which sub-order 40—Cotton and sub-order 42—Dress, are the most important. Nearly all the persons shown in the former are cotton-weavers, while those in the latter are mainly tailors. It may be noted that of the 1,459 persons included in the latter sub-order, 983 or 67·37 per cent. were enumerated in towns.

74. The next order—Metals and Precious Stones—contains 2,745 persons, the majority of whom are gold and silver workers and blacksmiths. The former number 1,606 and the latter 822.

75. The last order—Wood, Cane and Leaves—contains 2,985 persons, of whom 908 are carpenters, 333 are wood-cutters and sawyers, and 1,602 are basket-weavers and winnowing-pan makers.

### CLASS E.—COMMERCE, TRANSPORT AND STORAGE.

76. This class is divided into two orders: XVIII—Commerce, and XIX—Transport and Storage. The former contains 638 persons, of whom more than one-half are general shop-keepers and contractors. In the latter there are 2,286 persons, 80 per cent. of whom are cart-owners and drivers. This is not strange, seeing that nearly all transport is by cart, Coorg having no railways or water communications.

### CLASS F.—PROFESSIONS.

77. There are two orders in this class: XX—Learned and Artistic Professions, and XXI—Sport and Amusements. The former contains 3,000 persons and the latter only 164. Among the former, persons engaged in religious services number 1,103; schoolmasters 466; private secretaries and clerks 548; *vakhis* 128; and unqualified medical practitioners 159. The latter order is chiefly made up of exhibitors of trained animals (88) and *shikaris* (33).

### CLASS G.—INDEFINITE OCCUPATIONS.

78. Class G contains two orders: XXIII—Indefinite, and XXIV—Independent of Work.

79. Persons engaged in indefinite occupations number 11,963, or 6·91 per cent. of the total population. Of these, 10,414 are general labourers, 955 are rice-pounders and huskers, and 277 are road labourers. Among rice-pounders and huskers, the females largely predominate, for this occupation is usually carried on by that sex. Many of the general labourers are probably in reality agricultural labourers.

80. Order XXIV contains 963 persons, or 0·56 per cent. of the total population. It is divided into two sub-orders:

Order XXIV.—Independent of Work.

76—Property and Alms, and 77—Supported

at the Public Charge. The only important item in the former is that relating to ordinary beggars, who number 716. The latter includes 113 pensioners, most of whom live in towns, and 118 prisoners. Among prisoners again, 18 were under trial at the time of the census, 4 were civil prisoners, and 96 were returned as convicts.

## CHAPTER XII.

## THE ADMINISTRATION OF THE CENSUS.

81. In connection with the taking of the census and the abstraction and tabulation of the results, Coorg was treated as a district of Madras, and the arrangements were identical with those made in that Presidency. They have been fully described in the Madras Census Report, and I need not recapitulate them here. The extracts from the District Magistrate's report printed as an appendix to this chapter, give all the necessary information special to Coorg. There was no difficulty in obtaining enough enumerators, and there was no opposition on the part of the people. The only person prosecuted under the Census Act was a Government official who neglected his duty. The cost of the census was Rs. 3,841-7-6 or Rs. 22-3-2 per thousand of the population. The charges for abstraction, tabulation and superintendence were arrived at by a *pro rata* distribution of all the charges for the different Provinces and States dealt with by me. Details of the charges are given in the appendix. The expenditure is considerably larger than in 1881, but the cost of printing the tables and report alone is Rs. 1,500, and it is this large item which makes the rate on the population so high, for this particular does not vary with the numbers dealt with as it costs as much, or nearly as much, to print tables and a report for a small as for a large population. It is not clear whether the charges for printing the report and tables were included in the expenditure of 1881.

## APPENDIX.

### APPENDIX A.

*Extract from the Report of B. C. Leggatt, Esq., First Assistant Commissioner and District Magistrate of Coorg.*

The lists of villages and hamlets and information regarding the number of houses were furnished by the Nád Parpatigars. The Taluk Subedars checked these particulars by personal inspection and by comparing them with the information available in the records kept for revenue purposes. The area of every village has been determined.

The maps of the taluks in Coorg, which were specially prepared for census purposes, were utilized for the purpose of determining the blocks and circles in each nád, although the census divisions were not marked upon them.

Enclosures containing separate huts or houses were marked with a serial number, and the separate huts or houses with separate sub-numbers.

The numbers in each village or block were consecutive.

All unoccupied houses were numbered, ruined houses being omitted.

Buildings other than houses were also numbered. Jails and hospitals were given only one number.

The numbers were marked in English with tar on the doors or on the wall in front of the buildings.

The numbering of houses, etc., was commenced on 10th August 1890 and completed by the end of November. As the numbers were marked with tar, they would have lasted until the census, even if the numbering had been done earlier.

The buildings numbered were entered in a book called the Village List, forms of which were supplied to all Subedars and Parpatigars.

There was no difficulty in obtaining the requisite number of enumerators. There were 11 charge superintendents, 129 supervisors, and 1,312 enumerators. The number of special enumerators appointed to take the census of travellers by road and houseless persons was 30.

Among the supervisors 113 were officials and 16 non-officials (nine schoolmasters, two pleaders, and five agriculturists).

Among the enumerators, 78 were officials and the rest non-officials. The occupation, etc., of non-official enumerators is given below :—

Schoolmasters	.	.	.	.	.	.	.	.	.	.	.	44
Vakeels	.	.	.	.	.	.	.	.	.	.	.	4
Clerks in private employ.	.	.	.	.	.	.	.	.	.	.	.	42
Agriculturists	.	.	.	.	.	.	.	.	.	.	.	947
Shopkeepers	.	.	.	.	.	.	.	.	.	.	.	92
Patails (village headmen)	.	.	.	.	.	.	.	.	.	.	.	85
Stamp-vendor	.	.	.	.	.	.	.	.	.	.	.	1
Others	.	.	.	.	.	.	.	.	.	.	.	19

1,234

No remuneration was paid to non-official enumerators. It is gratifying to note that the majority of the enumerators worked satisfactorily.

The services of the officials of all the departments in Coorg were utilized for carrying on the census work.

2,657 books containing 42,602 schedule pages, 2,000 loose schedules (vernacular), 1,000 house-holders' schedules for Europeans and Eurasians, and 200 house-holders' schedules for natives of India, were received according to indents sent from my office.

124 books and 320 house-holders' schedules for Europeans were not used. The Native house-holders' schedules were also not issued, as they were received too late. I am of opinion that these schedules should be issued only to those natives who are conversant with English, as those who know only the vernaculars are likely to make mistakes in filling up the columns.

All the enumerators were instructed first by the Parpatigars and subsequently by Subedars. All the supervisors were instructed by me and the officials of my office, who were deputed for that purpose. The majority of the enumerators in every taluk

## APPENDIX.

were also instructed by me when I visited the taluk and the nād head-quarters for the purpose of examining the census work done by the revenue officials. The following method of instruction was adopted :—The rules for the guidance of the enumerators and supervisors were read out and clearly explained. Afterwards people of different ages, castes, and sects were produced, and some of the enumerators were asked to make the necessary entries on manuscript schedules. These entries were read out and the mistakes pointed out to all present. Each enumerator was furnished with a copy of the printed instructions, and the copies of the manual for charge superintendents and supervisors were also distributed to the officers concerned.

\* \* \* \* \*

In rural districts the preliminary record was commenced on 6th January 1891 and completed by the end of the same month. In one nād the preliminary record was completed on 10th February 1891. In municipalities it was begun on 1st February 1891 and completed by the 10th of the same month.

The preliminary record was checked by the Subedars and the parpatigars generally with reference to the instructions given for filling up the columns. Several books were also examined by me in the course of my tours. The general opinion as to the preliminary record is that it was accurate except in two or three blocks, mistakes of which were rectified afterwards.

The time occupied in taking the final census varied from 2 to 6 hours in different localities. There were trained extra enumerators in every nād, and there was no difficulty in supplying the places of those who prepared the preliminary record, but were absent at the time of the final census.

There were 30 special enumeration stations (chiefly police stations and toll gates). The work of enumerating travellers, etc., was entrusted to the police. Beat constables were posted at every junction to ensure the enumeration of all travellers.

The census of one estate in Ammathinad was taken by day, as it was, through an oversight, not included by the revenue officials in any of the blocks in that nād.

The preparation of the enumerators' circle and taluk abstracts was completed by the 3rd March 1891, and the district abstract by the 10th March 1891. The delay in the preparation of the district abstract was due to the fact that *all the abstracts* were checked in my office, as errors were discovered in several abstracts sent from the taluks.

There was no opposition on the part of the people to the taking of the census. This was due to the fact that the people rightly understood the object of Government, and that the experience of the two previous censuses removed all groundless fears in connection with the measure.

A Government official was prosecuted under section 10 of the Census Act for neglect of duty and was fined R10.

There is no doubt that the census was pretty correctly taken, as all possible endeavours were used to ensure accuracy.
